

# **School Workforce Management & Event Management Platform**

## **Comprehensive Functional Requirements Document**

### **1. Objective**

A centralized platform for assigning, tracking, reviewing, approving and evaluating tasks across all school stakeholders including Chairman, Principal, Coordinators, Teachers, Managers, Accountants and Event Coordinators.

### **2. User Roles**

Chairman/Director, Principal, Academic Coordinator, Administrative Manager, Accountant, Teachers, Class Teachers, Event Coordinators and Team Members.

### **3. Core Modules**

Task Management, Workflow Approvals, Meeting Management, Document Repository, Notifications, Performance Evaluation, Reporting & Analytics, Calendar, Budget & Procurement, Event Management and Role-Based Access Control.

### **4. Task Workflow**

Create Task → Assign → Accept → Execute → Progress Updates → Submit → Review → Approve/Reject → Complete.

### **5. Task Features**

Deadlines, priorities, reminders, recurring tasks, file uploads, comments, feedback, escalation, approval chains and audit logs.

### **6. Evaluation System**

Tasks evaluated on Timeliness, Quality and Accuracy. Employee and department performance dashboards generated automatically.

### **7. Meeting Management**

Schedule meetings, record attendance, upload minutes, assign action items and track completion.

### **8. Event Management Module**

Principal assigns an Event Coordinator. Coordinator creates event teams, assigns tasks, tracks progress, manages budgets, conducts reviews and submits final event reports.

### **9. Event Teams**

Cultural Team, Logistics Team, Hospitality Team, Finance Team, Publicity Team, Discipline Team and other event-specific committees.

### **10. Dashboards**

Separate dashboards for Chairman, Principal, Coordinators, Event Coordinators and Employees showing pending, completed and overdue tasks.

### **11. Reports**

Employee Reports, Department Reports, Event Reports, Productivity Reports, Compliance Reports and Annual Performance Reports.

## **12. Technology Recommendation**

Flutter Mobile App (Android/iOS), Web Dashboard, PostgreSQL/Firebase Backend, Cloud Storage, Push Notifications and Role-Based Security.

## **13. Future AI Features**

AI-generated meeting minutes, workload balancing, smart reminders, automated summaries and predictive performance analytics.

## **Expected Outcome**

A complete School Operations Management Platform providing accountability, transparency, workforce productivity tracking, event management and data-driven decision support for school leadership.
